PROFESSIONAL SUMMARY

Low-level systems and software developer specialized in Rust/C/C++, with 2+ years of experience in embedded applications and infrastructure tools. Passionate about development in Linux environments.

EDUCATION

École Supérieure d'Ingénieurs Léonard de Vinci (ESILV) Oct, 2025 — Present
Bachelor's Degree, Computer Science & Cybersecurity, Specializing in Data & Cloud Engineering Courbevoie, France

- Coursework: Data Engineering, Cloud Computing & Cloud Architecture, OOP Programming, Java/J2EE, AI Algorithms, Python for Data Eng & AI Dev, Cisco Dev Networking, DevSecOps, Android Development, C# Programming

ENSITECH Oct, 2023 — Sep, 2025
Advanced Technician's Certificate (BTS) in IT Services for Organizations, Software Solutions and Business Applications option Montigny-le-Bretonneux, France

- Professional Exams Average: 18.33/20 | Overall Average: 17.63/20
- Coursework: Advanced Algorithms, Full-Stack Web Development, Systems and Network Administration, IT Security, Agile Project Management, Databases, Java, Python, JavaScript, HTML/CSS, Dart/Flutter, DevOps Practices

PROFESSIONAL EXPERIENCE

Developer and IT Technician Oct, 2023 — Present
SabSystem Paris, France

- Designed and deployed an orchestration platform (Django) for controlling satellite reception equipment (DVB), automating TV stream deployment and reducing turnaround times from days to hours.
- Developed a native Wayland kiosk application in C++ (GTK4/WebKitGTK/GTK4-LayerShell) with hardware acceleration on Raspberry Pi 5, optimized for high availability and high-performance graphics rendering.
- System security and Linux hardening through custom OS images, implementation of data encryption (LUKS), and immutable file systems (OverlayFS).
- Adapted C source code of the MPV media engine to integrate specific protocols and manage EPG (Electronic Program Guide) data within the existing infrastructure.

PROJECTS

Author and Maintainer, Wayglance (github.com/semanavasco/wayglance) Feb, 2026 — Present

- Declarative and reactive shell framework for Wayland, configurable in Lua and developed in Rust/GTK4.
- Implemented a reactivity engine and a signal bus synchronized with the compositor (Hyprland IPC).
- Developed Rust procedural macros for automating Lua bindings and LSP definitions.
- Enables the creation of custom user interfaces and dynamic desktop widgets in Lua.

Author and Maintainer, ttt - terminal typing test (github.com/semanavasco/ttt) Dec, 2025 — Present

- Terminal typing test application, developed in Rust with a TUI using the ratatui library.

Author and Maintainer, dotfm (github.com/semanavasco/dotfm) Oct, 2025 — Present

- Dotfile manager in Rust, enabling configuration synchronization and deployment across multiple machines via Git.

CERTIFICATIONS

Academy Graduate - Cloud Foundations, Amazon Web Services (AWS) Dec, 2025

Next.js App Router Fundamentals, Vercel Jul, 2025

React Foundations for Next.js, Vercel Jul, 2025

SKILLS

- **Programming:** Rust, C/C++, Python, Java, SQL
- **Systems & Embedded:** Linux Hardening (LUKS, OverlayFS), Wayland, GTK4, Raspberry Pi, Unix Shell
- **Technologies & Cloud:** AWS (Certified Foundations), Docker, Git, CI/CD, Linux Administration
- **Soft Skills:** Curious, Perseverant, Autonomous, Rigorous
- **Linguistic Skills:** Portuguese (Native), French (Fluent), English (Fluent, TOEIC: 975/990)
